

# Overview

Araknavar, the Widowmaker, is the mistress of silent death, woven fate, treachery, and shadowed consequence. Her presence is often described through webs, threads, hidden movement, and the quiet moment before betrayal becomes known.

She is not merely a figure of death, but of patience, design, and inevitability. Her followers believe that every vow, lie, murder, and secret leaves a thread behind. Araknavar sees the pattern long before mortals understand they are caught within it.
